HAYAME

Brand Guide

Identity · colour · type · layout · voice · v2.0 · October 2026

www.hayamegh.com

01 · WHO WE ARE

Neighbourly, clear, premium.

Hayame is Ghana's peer-to-peer car-sharing marketplace. Renting a car should feel as easy and local as borrowing from someone down the road, with the polish of a product you trust with your money.

Friendly

Warm, a little playful, always local. We joke with people, never at them.

Confident

We state things plainly. No hedging, no hype, no jargon.

Clear

One idea at a time. If it needs a paragraph to explain, it is not ready.

The feeling

Open sky, clean white paint, a road ahead. Calm blue, sharp type, generous space. Premium comes from restraint, not decoration.

Promise

Verified hosts, clear prices, secure payments, booked in minutes. Two audiences, one product: **renters** who want a car, **hosts** who have one.

Say it two ways.

English

Hire me.

/ hire · mee /

Twi

Haya mɛ.

/ ha · ya · meh /

- In running text always write **Hayame**: capital H, one word, no hyphen, never all caps.
- “Hire me / Haya mɛ” is a play on the name for headlines and captions only. It is the car speaking.
- Dictionary form, for the profile bio: **hay·a·me** (noun).
- **Confirm before posting:** have a Twi speaker check “Haya mɛ”, its meaning and the pronunciation guide.

03 · LOGO

One mark, three colourways.

Primary · white and light surfaces

Reversed · brand blue

Reversed · navy and photos

Rules

- Clear space on every side equals the height of the “H”.
- Minimum height 40 px on screen. 56 px on a 1080 px post.
- Top-left on social posts, 96 px from the left and top edges.
- On photos, always sit it on a dark gradient, never on a bright or busy area.

Never

- Stretch, rotate, outline, shadow or animate the letterforms.
- Recolour outside blue, white or navy.
- Put it in a box, badge or sticker.
- Type the name in another font as a substitute for the logo.

04 · COLOUR

Blue does the talking.

Hayame Blue
#1484D9 · dark UI #4DB3FF

Primary. Buttons, links, accent on light

Navy
#0A2B54 · dark UI text #EAF4FF

Headlines on light, dark surfaces

Sky
#7CCBFF

Accent word on dark and photo backgrounds

Mist
#EDF7FF · dark UI #123452

Light backgrounds, tinted cards

Page
#F7FAFF · dark UI #071A2F

App page background

Muted text
#737D91 · dark UI #A8B4C8

Secondary text on light

Success #1CA160 **Warning #ED8F30** **Danger #E04040** **Signal Red #E5332A · social only**

Proportion: 60% blue, navy and white · 25% photography · 10% Sky and Mist · 5% or less everything else. **Gradients** run navy to blue (#06182E → #0A2B54 → #0E4C8C) or deep to bright blue (#0E66B8 → #1484D9 → #2E9BEA), always diagonal at about 155–160°. The primary button runs Blue to Navy left to right. **Contrast:** body text on light is Navy, never Blue. Sky is for large display type on dark only. Status colours carry meaning (paid, pending, error), so never use them for decoration. Signal Red is a one-off poster accent; do not use it in product. **Known mismatch:** the website still uses #0E86D4 for links and #FAFAFA for its page. Align it to #1484D9 and #F7FAFF when next touched.

05 · TYPOGRAPHY

Geist, tight and heavy.

Aa Geist Black

Display. Tracking −4%, leading 100%. Sentence case, ends with a full stop. Highlight one phrase per headline: Sky on dark, Blue on light.

Geist Medium for the supporting line

Role	Weight	Social (1080 × 1440)	Product
Headline	Black 900	88–156 px, max 128 on most posts · 8 words max	Bold, 22 px titles
Subline	Medium 500	34–40 px, 90% opacity	Medium, 13–15 px
URL / CTA	Bold 700	34 px	Semibold, 16 px buttons
Caption, label	Semibold 600	Stamps: Black, +8% tracking, caps	Semibold, 10–12 px

Geist is free from vercel.com/font; files live in scripts/assets/geist. The website loads Geist. The native apps currently use the system rounded face (SF Rounded on iOS). Keep that for in-app UI until Geist is bundled; do not mix the two on one surface. Never use more than two weights in one headline block. Caps are for stamps and tiny labels only.

06 · SHAPE & SURFACE

Soft corners, quiet shadows.

Corners

- Cards and sheets: **16 px** radius, continuous (squircle) corners.
- Buttons, fields, tiles: 12–14 px.
- Chips, pills, avatars: fully round.
- On posts, cards are 32 px (the 1080 px scale) and the phone frame 72 px.

Elevation

- Light mode: white card, 1 px hairline (black 6%), shadow black 5%, blur 10, y 4.
- Dark mode: card #0E263F, hairline white 10%, shadow black 28%.
- Primary button: blue shadow at 28%, blur 8, y 4.
- One level of lift is enough. Never stack shadows.

Space

- Product uses a 4 px base; common steps 8, 12, 14, 16, 24.
- Posts use 96 px margins, with headline at y 232 and footer row 72 px tall.
- When unsure, add space, not elements.
- Icons: rounded, 2 px line, one weight across a screen.

Dark mode

The app has a full dark theme: page #071A2F, cards #0E263F, raised #132D49, Blue lifts to #4DB3FF and Navy text flips to #EAF4FF. Auth header drops from bright Blue to a muted #0E3A66 so it reads premium, not glaring. Social posts stay on the light and navy set above.

07 · SOCIAL LAYOUT

A grid you can trust.

- **Margins:** 96 px on all four sides. No text crosses them; the build script measures every box and fails if one does.
- **Logo:** 56 px tall, top-left at (96, 96). **Headline** starts at y = 232.
- **Footer row:** 72 px tall, bottom edge 96 px from the bottom. URL left; five social icons right (38 px, 26 px apart: Instagram, Facebook, TikTok, Snapchat, X). White on dark, navy on light.
- **Store badges** (download posts only): identical 216 × 72 px, 20 px apart, in the footer row, URL moves above them. Swap the Google Play stand-in for Google's official badge before publishing.
- **Photo posts:** navy gradient from the top (92% → 62% at 36% → 0 at 64%) so type always sits on dark.
- **Export** PNG, sRGB. Always add alt text.

Social icon set sits here for reference:

Real cars, real Accra.

Natural light, a clean car, a street that looks like home. The photo carries the post; the type sits in the sky above it.

Do

- Car in the lower third, sky or buildings above for the headline.
- Crop 3:4. Keep the car's full silhouette.
- Use real listings and real Ghanaian streets.
- Blur number plates, every time.
- Show people sparingly: natural, smiling, hosts and renters.
- Vary the cars across the feed.

Don't

- Stock cars or streets that do not look like Ghana.
- Heavy filters, HDR, or cooling the paint colour.
- Text over bright or busy areas without the gradient.
- Dealership-style hero shots with showroom reflections.
- Any photo showing a price, plate or a person who has not agreed.

A small toolkit, used with discipline.

Highlighted phrase

One phrase per headline in Sky (dark) or Blue (light). The second half of the idea, ending in a full stop.

Stamp

Rotated −7°, 6 px Sky border, 20 px radius, Black caps, +8% tracking, on a 35% navy fill. One per post, only on playful host posts.

Phone mock-up

Dark bezel, 72 px radius, soft shadow. Only screens without prices: Car Detail (top) and Dashboard.

UI cards

White 32 px cards that mimic notifications, chats or settings. Make them screenshot-worthy, not busy.

Speech bubble

For the car talking: “Hire me.” White bubble, Navy Black-weight text, tail pointing to the car.

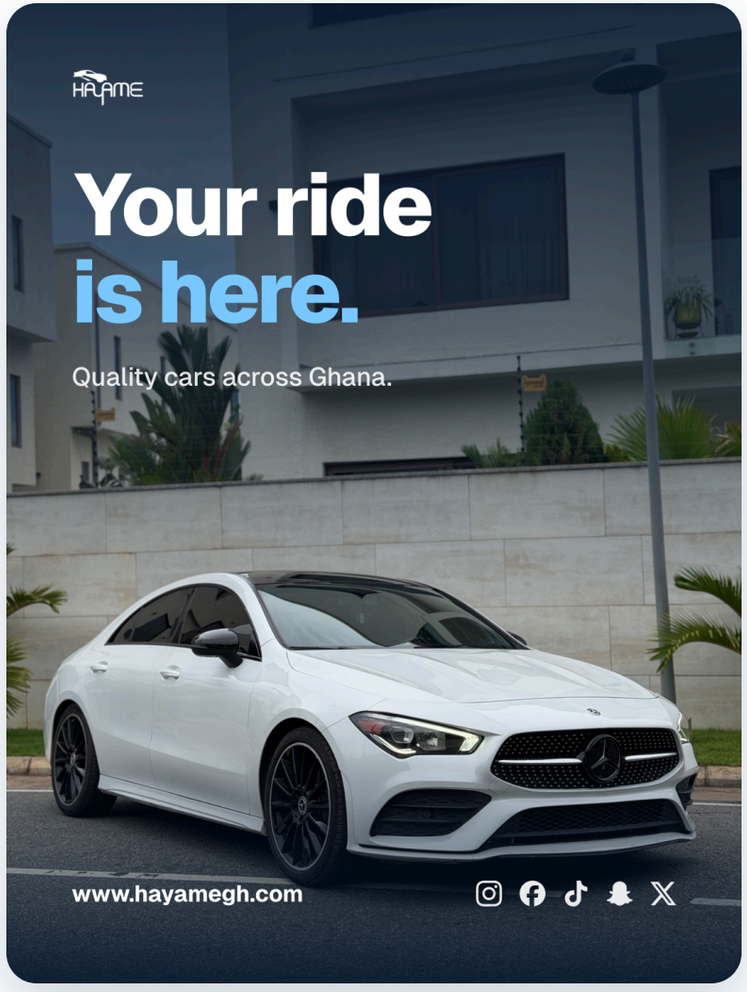

Badges and icons

Official store badges, same size. Social icons in the footer row. Nothing else decorates a post.

Rule of thumb: a post gets **one** device at most. If you want two, split it into two posts. Motion (Stories, Reels): ease-out 250–350 ms, fade and rise 12 px, nothing bounces.

10 · EXAMPLE · RENTER / BRAND

Your ride is here.

Why it works

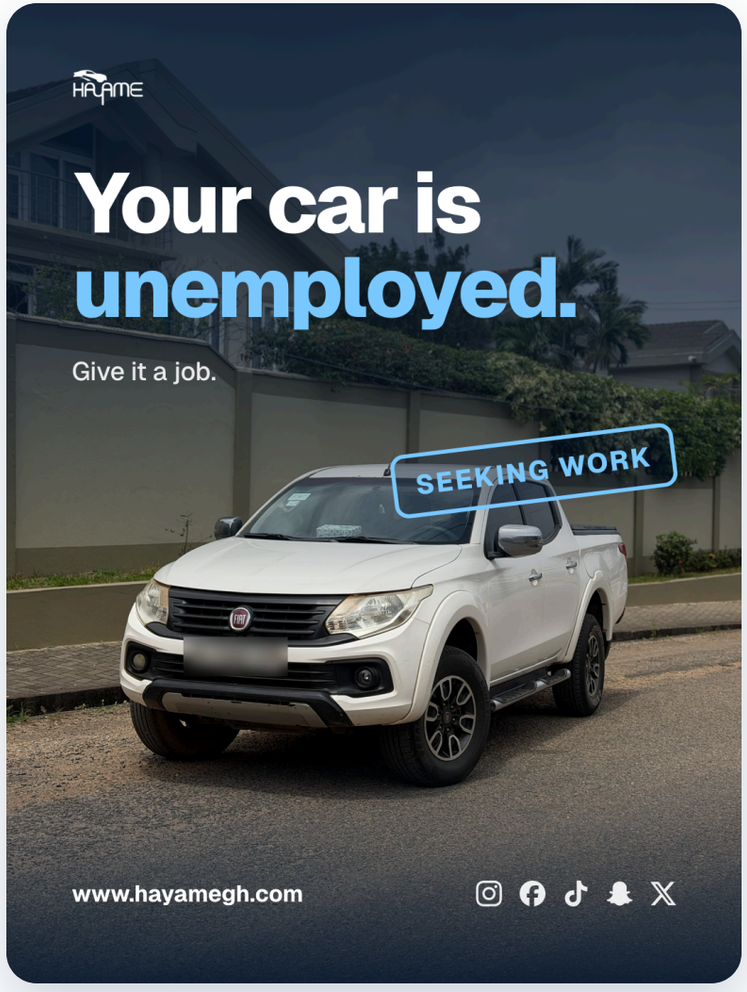

- **Photo-led.** A white car in a calm Accra street. Car in the lower third, buildings above give the headline room.
- **Navy top gradient** keeps white type crisp without flattening the photo.
- **Four words, one highlight.** “Your ride” in white, “is here.” in Sky.
- **One subline.** “Quality cars across Ghana.” Medium, 90% opacity.
- **Fixed frame.** Logo top-left, URL bottom-left, icons bottom-right, all on the 96 px margin.

Caption

Your ride is here. 🚗 Quality cars, ready across Ghana. Book in minutes at www.hayamegh.com

#Hayame #CarRentalGhana #RentACarGhana #Accra

Your car is unemployed.

Why it works

- **A joke that sells.** A parked car as a jobless friend. Relatable, shareable, friendly, never shaming.
- **The stamp** “SEEKING WORK” is the single graphic device. It lands on the windscreen where the eye goes.
- **The sub answers the joke.** “Give it a job.” is the call to action without sounding like one.
- **Same frame as every post.** The system does the branding, so the joke can be loud.
- **Compliance:** plate blurred, no income figure, no promise of earnings.

Caption

Your car is unemployed 😭 Give it a job. List it on Hayame: www.hayamegh.com

#Hayame #SideIncome #CarOwnersGhana

Short. Plain. Benefit first.

Write like this

- Under 8 words in a headline. Full stop at the end.
- Lead with what the person gets, not what we built.
- Renters: speed, clarity, trust. Hosts: control, income, ease.
- Ask for one action per caption: tag, comment, save, tap.
- Emoji sparingly, in captions only (🚗 👀 😭 🌙), never in headlines.
- Web and app: “Book”, “List your car”, “Become a host”.

Not like this

- “Revolutionary”, “seamless”, “world-class”, “ecosystem”.
- Exclamation marks in headlines. Questions only when we want a reply.
- Slang we would not say to a stranger. Cheeky yes, rude no.
- ALL CAPS sentences. Hashtag walls over five tags.
- Putting handles inside the image; they go in the caption.

Sample headlines

Your ride is here. · Rent from someone down the road. · See it all before you pay. · Own a car? You own a business.

13 · CLAIMS & COMPLIANCE

Only say what is true today.

Safe to say

- Hosts apply with ID and are reviewed before they list.
- New listings are reviewed before going public.
- Checkout runs in the app (Paystack); every booking is recorded.
- Host contact details stay hidden until a booking exists.
- No ad tracking. Analytics are optional.

Never say

- Insurance, “fully covered”, “100% safe”, “bank-grade”. We do not advertise bundled insurance.
- Any price, fee, income or earnings figure, in text or screenshots.
- “Guaranteed” anything.
- Real people, plates or locations without consent.

Before you post

- Logo top-left, URL bottom-left, five icons bottom-right.
- One highlighted phrase, one device at most, one idea.
- Nothing crosses the 96 px margin. Plates blurred. No prices.
- Alt text added. Caption has one call to action.
- Run **python3 social/build-social-posts.py** then **build-brand-guide.py** to regenerate assets.
